2/6/1953 – A severe thunderstorm produced a tornado that initially touched down near the city of Livingston. The tornado moved almost due east along HWY 190. The F2 tornado was responsible for 2 deaths and 21 injuries. In all, the tornado caused an estimated \$2.5M in damage along its 9 mile path.

6/8/1989 – A cluster of severe thunderstorms that developed near Lafayette was responsible for a tornado outbreak across southeast LA. In Livingston Parish, at least 3 different tornadoes caused damage across the area. The first was an F2 tornado that affected a wooded and sparsely populated area in the northern portion of the parish causing about \$25K in damage. The second tornado touched down near Denham Springs. Though the F1 tornado was short lived, with a total path length of only 1 mile, it was responsible for 1 injury and about \$250K in damage. A third tornado was spawned by the same storm that spawned the second tornado. This third tornado touched down near Walker and continued northeast for about 5 miles to near Walker. The tornado was responsible for about \$25K in damage along its path and was rated an F1.
